I can compile some files with `-language standard=c` in OCaml, but I cannot compile other ones with it. I'd like to change my default language standard to `c`, since I'm using OCaml for both C and C++, but I have no idea how to change the compiler's language standard. Thanks! A: It is actually a simple thing to do, but does require some edits to your.cmi files. You need to find the right lines that tell the compiler which language standard to use: (the first part is a comment, and the second part is a comment with a commentHandler). Change the regex to match the standard you want to use. Then, on the command line, you need to pass the `--std=language_standard` option. `$ ocamlc -g your_file.cmx -o your_file.o -cclib -cclib -cclib -cclib` Edit: I made a mistake. You only need to do it for.cmi files. A lot of you may not know, but I have been a fan of Marvel movies ever since I was a kid. Even before I discovered the wonders of the internet, I remember trying to figure out when Iron Man first made an appearance in the comic books. And with the MCU having already introduced a few characters that I knew were going to 82157476af
